Studying at the **Medical University of Graz**

MEDICINE Profound medical knowledge

DIPLOMA PROGRAM:

12 SEMESTERS

This program aims at providing students with a wide-ranging medical education and thereby giving them an optimal basis for further training in all medical fields.

MEDICAL SCIENCES A new program for the new needs in health care

DOCTORAL PROGRAM:

4 SEMESTERS

This program aims at enabling students to conduct research on their own responsibility in biomedical and clinical fields.

NURSING SCIENCE A new program for the new needs in health care

BACHELOR'S PROGRAM*:

6 SEMESTER

MASTER'S PROGRAM*:

4 SEMESTERS

This new and modern program accounts for all new needs and challenges in health care

(* planned curricula changes in the bachelor's and master's program with winter semester 2007/08).

PhD-PROGRAM research and science as international training

DOCTORAL PROGRAM:

6 SEMESTERS

Starting in winter semester 2007/08 the program aims at enabling future researchers to contribute to the development of medical science. This program as third cycle in the Bologna Process and is both training and active research in terms of the „European Charta for Researchers“.

DENTISTRY Profound basic training combined with expert know-how

DIPLOMA PROGRAM:

12 SEMESTERS

After a profound basic training this program prepares students step by step for expert know-how: Prosthodontics, Restorative Dentistry, Periodontology and Implantology; Preventive and Operative Dentistry, Endodontics, Pedodontics and Minimally Invasive Dentistry; Parodontology; Oral and Cranio-Maxillofacial Surgery.

Detailed information: www.meduni-graz.at/studium

The core competencies of the Medical University of Graz are: high-standard training and education, research at an international level and continuous improvement of top-quality-medicine. Additionally, the orientation toward the bio-psycho-social model is one of the main concerns of the university. This orientation is also clearly reflected in the field of education, where patients with their ailment and environment take the center stage and specialists will come to them.

Not only in research and patient care the Medical University of Graz breaks new grounds. This applies especially to the field of education, where a new curriculum for medicine has been introduced in 2002. According to this curriculum students start their education with practical training and the medical knowledge will be imparted in special modules. For the students this means practical experience at a very early stage of their studies, seminars

and small study groups. Furthermore, emphasis is laid on both medical knowledge and on social competence and ethics. In the fall of 2004, the new study program "Nursing Science" was introduced at the Medical University of Graz. It is the only regular one in Austria and accounts for all the new needs and challenges in health care.

Also in the field of "new media in education" the Medical University of Graz ranks first: The VMC (Virtual Medical Campus) accompanies the study programs with numerous digital teaching resources and educational objects.

Facts&Figures:

- ▶ approx. 5,000 students
- ▶ 350 annual graduates
- ▶ 20 clinical departments, 16 pre-clinical institutes and 3 centers in the pre-clinical sector
- ▶ founded as Medical Faculty in 1863
- ▶ autonomous Medical University since 2004

UNIVERSITY TRAINING COURSES

The Medical University of Graz also offers high-class postgraduate courses which focus on different topics in health care.

- ▶ Dermoscopy
- ▶ Interdisciplinary Course for Children's Advancement and Family Assistance
- ▶ Medical Management
- ▶ Public Health
- ▶ Public Health in Health Care
- ▶ UTC for Physicians in National Health Service
