Welcome by the rectorate

Dear students,

It is our pleasure to welcome you at the Medical University of Graz. Your decision of spending a clinical elective here in Graz will turn out to be a great enrichment for your future as well as for your personal life. In return, for our university it is one more step ahead towards internationality.

At the beginning of the year 2004, the former medical faculty of the dignified Karl-Franzens-University was turned by law, 140 years after its establishment, into an independent Medical University that has committed itself to sustainability by means of a university of health.

This comprises the University and its infrastructure as well as our spectrum of studies and the research field of "Sustainable Health Research" as a focal point. Our programs of study are certified internationally and our students show excellent performance in comparison to other institutions.

Now, as a young and dynamic University, we would like to continue and reinforce this open-minded tradition towards other countries.

We would like to thank you in the name of the rectorate for your decision of studying at the Medical University of Graz, wishing you a successful and exciting stay in one of the most beautiful cities in Austria!

The University

The University of Graz was founded in 1585 as one of the first universities in Central Europe. Since 1863, when the Medical Faculty was built up, the University contributes to the flourishing of the “academic-city” Graz. In 2004, the Medical University was outsourced from the Karl-Franzens-University and became an independent university that comprises 3 research centers, 23 clinics and institutes and 1.500 employees. At the moment about 5.300 students are registered at the Medical University of Graz.

Univ.-Prof. Dr. Gilbert Reibnegger, Vice-Rector for Teaching and Studies:

*„Our highlights in the fields of teaching are the **practical trainings at the LKH/University Clinical Center and the Hospitations at doctors or at medical institutions in the extramural field.** These courses are real USPs; we only have them in Graz!*

I hope that the great cooperation, that we have built up when developing the new curricula, will spread over all fields of the new Medical University and I hope that we will build up a successful future together, as an essential knot in the network of the upcoming European University Area.”
